Log systems

LAXO
OUR OWN WAY

Laxo LX – a sound investment

If you're looking for a light yet robust, productive and flexible solution, Laxo LX is the right choice. With Laxo LX you can easily optimise the rig to your own and your customers' needs. With a handy built-in autotensioner, in combination with the Laxo hook and quick releasesystem, loading and unloading are quick and easy whatever the weather.

Laxo LX is a new generation of log system based on an efficient, tried and tested modular system. Each rig is tailored for maximum utilisation, with high loading capacity and efficient work cycles. The newly developed bolsters is the strongest on the market and the reversible stanchions can take extreme loads without deforming. With slide plates that have an extra long life span and easily exchangeable stanchions, Laxo LX is designed and built for the optimum performance day after day, year after year. Quite simply, it's a sound investment.

The new auto-tensioner makes the job far easier. The hook is now down on the bolster, and you can lash the load securely without having to stretch and attach the hook high up the chain.

Low weight, no compromises

Despite its low weight, Laxo LX does not compromise on strength or efficiently integrated accessories. Choose Laxo LX and you're choosing a rig that will load a lot, last a long time and make loading and unloading easier. An investment that puts the focus on profitability.

- **The strongest bolster on the market**

With the strongest aluminium bolster and strong, rigid stanchions, you get a rig that can handle the maximum load.

- **Low weight**

New weight-saving frame-attachments, lightweight stanchions and an intelligent design with reinforcements at vulnerable points make for a low weight and maximised loading capacity.

- **Flexible construction**

Laxo LX is a complete system that draws on experiences from all the previous generations. The result is a modular system that makes it possible to customise every single rig.

- **Effective accessories**

The new auto-tensioner has a auto parking position, longer tensioning length and is easier to handle. Along with the quick release, Laxo hook and Laxo crane quicklocksystem, this means fast, easy loading and unloading.

- **Trouble-free driving**

Slide plates with an extra long life span, the strongest bolster on the market, sturdy stanchions and uncompromising construction make Laxo LX a sound investment for many miles of trouble-free driving.

The stanchions are easy to dismount and reverse – or replace should they get damaged.

Easy adjustment of the angle between the bolster and stanchions maximises loading capacity when transporting different types of load, for example sawn timber.

Development that focuses on your profitability

Laxo Mekan has always gone its own way. With a focus on total economy, flexible solutions and reliable quality, we develop constructions that give our customers the best conceivable competitive edge. Our sales staff and technical designers help you find the optimum construction, adapted to your and your customers' needs. This gives you a sophisticated rig with superior functionality, quality and life span. An investment that puts the focus on your profitability.
