

Aluminium stanchion

Load securing system

Secure the load exactly as you want by changing over the equipment before each journey. With the LAXO Sleeve on the platform, you are free to choose between container mounts, stanchions, anchoring eyelets or other special solutions.

The fact that your needs are constantly changing doesn't matter at all – with the LAXO Load securing system, you can adapt and develop your operation as much as you want.

The system comprises several parts

- LAXO Sleeve
- LAXO Container lock
- LAXO Steel stanchion
- LAXO Aluminium stanchion
- LAXO Anchoring eyelet

Aluminium stanchion

- Flexible modular system
- Lighter than steel
- Change to container lock or eyelet
- Seamless and anodised
- Flat side facing the load

Aluminium stanchion

Keep the weight down with stanchions made of seamless aluminium – without compromising on your load. This is ideal for anyone driving a flatbed truck, for example carrying machine parts, goods on pallets, planks or structural elements.

By having the flat side facing the load, this means that your sawn timber will arrive in perfect condition. Anodising produces an attractive finish.

Combine the upper section, lower section or the entire length according to your needs.

Technical specification

Order no.	Designation	Length, mm	Weight, kg
2197186	Upper section	1 250	5.0
2197086	Lower section	1 250	6.0
2197187	Upper section	1 500	6.0
2197087	Lower section	1 500	7.0
2196586	Entire length	2 200	8.7
2196587	Entire length	2 500	10.0
2196588	Entire length	2 800	11.0
2196589	Entire length	3 100	12.0

Capacity: 0.7 tonne-metres
