

Load securing system

Secure the load exactly as you want by changing over the equipment before each journey. With the LAXO Sleeve on the platform, you are free to choose between container mounts, stanchions, anchoring eyelets or other special solutions.

The fact that your needs are constantly changing doesn't matter at all – with the LAXO Load securing system, you can adapt and develop your operation as much as you want.

The system comprises several parts

- LAXO Sleeve
- LAXO Container lock
- LAXO Steel stanchion
- LAXO Aluminium stanchion
- LAXO Anchoring eyelet

LAXO Sleeve

- Flexible modular system
- Patented sleeve
- Select mounts, stanchions or eyelets
- The round outer side allows simple attachment
- Cover for flat platform

Steel sleeve

Aluminium sleeve

LAXO Sleeve

The completely round sleeve is easy to install, both on a platform and at the end on a bolster. The only thing you need to determine is what length you need.

With an aluminium sleeve, welding is simple if you have an aluminium platform, and it also works well on aluminium stanchions, of course.

The LAXO Sleeve is a universal solution for all securing of loads on both trucks and trailers.

Technical specification

Part no.	Designation	Weight
2268601	Sleeve type 11/63 RL140	2.7 kg
2268603	Sleeve type 11/63 RL150	2.9 kg
2268605	Sleeve type 11/63 RL160	3.2 kg
2268606	Sleeve type 11/63 RL175	3.4 kg
2286201	Sleeve type 11/63 RL140, alu.	0.9 kg
